

**Guaranteed Pass on  
CCNA R&S  
200-125 Exam!!**

### Programme Structure

#### Duration:

5 Days for two hours  
per days

#### Fees:

**Tuition:** KSh 10,000  
only

#### Dates/Sessions:

8.00am - 10.00am  
5.30pm -  
7.30pm

### Why take this course and get Certified ?

- Learn the concepts that you might have missed or were not clear
- Learn and practice the future networking concepts
- Helps you get certified and earn credibility and respect in your field
- Open more opportunities for advancement upon certification
- Employers trust skilled and certified staff

### Where to find us ?

#### (a) Main Campus

Waiyaki Way, Next to  
CCK: From City Center,  
Pick Matatu No.  
22/23/30 at Odeon and  
alight at 'Extelecoms'  
bus stop.

#### (b) Town Center Branch:

Second Floor Salama  
House, at the junction  
of Mama Ngina street  
and Wabera Street,  
Opposite City Hall

# CCNA R&S Refresher Programme

(AFRALTI is a Cisco Academy Training Center and an Authorized VUE Testing Center)

### Introduction

This programme exhaustively covers the key concepts in new CCNA R&S track. The Instructor will break down the usually difficult domains encountered in the CCNA programme into easy-to-understand concepts and at the end of the one-week intensive learning and labs sessions, the participant will be able to explain those concepts, but will also be confident to write the Cisco CCNA 200-125 certification.

### Target Group

- Academy students who have gone through the old CCNA programme and are seeking immediate certification.
- Academy students, Instructors and other professionals holding expired certifications.
- Professional seeking Cisco certification based on the new curriculum.

### Prerequisites

Participant are required to have gone through the old CCNA curriculum and are preparing for CCNA R&S certification.

### Course Content

- Network Fundamentals - IPv4 and IPv6 configurations
- LAN Switching Technologies—VLANs and inter switch connectivity, DTP, VTP (v1&v2), and 802.1Q, STP, BPDU guard, CDP, LLDP, EtherChannel, PAGP, LACP
- Routing Technologies - IPv4 and IPv6 static routing, OSPF, EIGRP, RIPv2
- WAN Technologies - PPP and MLPPP, PPPoE, MPLS, Metro Ethernet, DMVPN, site-to-site VPN, client VPN, BGP configuration, QoS concepts
- Infrastructure Services - Describe DNS operation, DHCP, NTP, NAT & PAT
- Infrastructure Security- Switch port security, 802.1x, DHCP snooping, IPv4 and IPv6 access list, AAA with TACACS+ and RADIUS
- Infrastructure Management - SNMP, Syslog, CDP, LLDP, SCP, SPAN

### Facilities & Instructors

This course is delivered by Certified Cisco Academy Instructors Trainers who have also attained the CCNA, CCNP, CCNA SECURITY certifications, and other IT certifications such as CISA and are continuously receiving advanced training in networking and telecommunications. Lab activities are completed using the latest Cisco equipment.

### Exam Preparation

During the training, we will prepare you to confidently handle the Cisco Certification questions including the MCSA; MCMA, D&D, Simlets, and Simulations exam questions.

The CCNA is one of the most respected ICT certifications in the world, becoming certified demonstrates your deep knowledge of networking

### Registration & Payment Procedure

The following payments option are available, payment is required before the course start date.

Equity Bank, Kangemi Branch, A/c Name:AFRALTI  
A/c No 1370261674031,Currency KSH, Swift Code:  
EQBLKENA

Standard Chartered Bank, Westlands Branch,A/c  
Name AFRALTI, A/c No 010 809 6935 200  
Currency KSh, Swift Code: SCBLKENXXXX

Using Mpesa: Steps: Go to MPESA menu – 'Lipa Na Mpesa' or 'Payment Services' – Buy Goods and Services' or 'Buy Goods' - Enter till Number 116126 – Type Amount – Type your secret PIN... complete the transaction and wait for a confirmation

Point Of Sale (POS): Card Payment (Swipe Card) at the Finance Office, Waiyaki Way

### Why train With us?

AFRALTI has trained numerous people who are now professionals in Network design, LAN/WAN administration, Network Engineers, Network Management and IS security professionals. From CCNA training some have advanced into specialized areas such as Voice, Wireless, Data Center, and IS Security.
