

AFRICAN ADVANCED LEVEL TELECOMMUNICATIONS INSTITUTE (AFRALTI)

TRAINING COURSE INFORMATION

Course: Certified Information Systems Auditor (CISA)

Class Sessions: Saturdays

Duration: Four Months

Time: 8.00 AM – 1.00 PM

Venue: AFRALTI

Tuition Fee: KSh. 52,000

Exam Fee: USD 710 Payable directly to ISACA

TARGET AUDIENCE AND PRE-REQUISITES:

Information systems management, audit, control and security professionals including the following:

- Aspiring IS auditors
- IT/IS Professionals
- Auditors
- Security managers / analysts
- Software Managers
- Infrastructure/Network Managers

The course is meant for IS and Business professionals specified in the target group as well as college graduates aspiring to become CISA certified.

COURSE DESCRIPTION:

Information technology, long considered as only an enabler of an organization's strategy, is now regarded as an integral part of this business strategy. Strategic alignment between Information Technology and enterprise objectives is one of the critical success factors. With the changing landscape concerning security, corporate governance, IT service delivery and systems reliability as well as regulatory requirements, the CISA course becomes vital for information technology line and senior managers.

The course moulds information technology professionals into complete and competent

individuals. The course covers the following five new CISA domain areas:

1. The Process of Auditing Information Systems
2. Governance and Management of IT
3. Information Systems Acquisition, Development and Implementation
4. Information Systems Operations, Maintenance and Support
5. Protection of Information Assets

TRAINING METHODOLOGY

The course is delivered using a blended learning model of lectures, discussions, case studies, assessment and practical exercises using a highly-structured, learner-centered teaching methodology that ensures maximum learning. Helpful learning resources will be provided to fully prepare the student to pass the ISACA CISA certification exam.

COURSE OBJECTIVE:

The main objective of this course workshop is to provide a comprehensive understanding of Information Systems auditing. This course will equip participants with the knowledge and practical skills necessary to successfully perform an audit process. This programme also adequately prepares the participant to successfully write the CISA certification exam.

COURSE OUTLINE

The following topics are presented and discussed to increase your understanding and abilities. CISA candidates are expected to have detailed understanding in each of these areas.

1. The Process of Auditing Information Systems
