

SATELLITE COMMUNICATIONS TRAINING AND CERTIFICATIONS

1 ANNOUNCEMENT

AFRALTI is pleased to announce that it now offers the GVF Training and Certification Program in Satellite Communications as part of its efforts to deliver value to its territory and member states. This is a timely addition to our ever-increasing course prospectus to help in capacitating AFRICA for ICT development.

2 What's on Offer

GVF's ENHANCED TRAINING SERVICES

All GVF courses are now available as part of an Enhanced Training Services (ETS) package. GVF ETS combines the benefits of a private learning system with the power of the full GVF curriculum plus custom courses and certifications, all managed and supported on GVF's advanced training program infrastructure. This access will be possible on the AFRALTI portal:

<http://www.afralti.org/gvf-satellite-professional-certification/>

The Enhanced Training Services program is comprised of a set of options enabling you to craft a plan ideally suited for your organization - whether it is a satellite operator, equipment manufacturer, service provider, or any other organization that uses satellite communications.

3 AFRALTI's Value Proposition

3.1 Client custom course(s)

Upon mutual agreement, custom courses will be developed and deployed on the AFRALTI's portal. Custom courses will be charged on a-per student enrollment fee based on course length, complexity, and expected quantity of students to be enrolled.

3.2 Instructor Led Training support

This feature is offered as an option (at additional cost) that can be activated upon written request from AFRALTI.

On-site classes including the Hands on Skills Test are managed using the OUR ONLINE learning system's "Instructor-Led Training" (ILT) features.

3.3 Client specific training paths and certifications

Automated training path to Certification is granted once a defined combination of courses has been completed in support of an organization's staff development program.

3.4 How to Register for Satellite Communications Certifications

Customers just need to place an order for GVF catalog courses with AFRALTI online from AFRALTI's portal: <http://www.afralti.org/gvf-satellite-professional-certification/>

3.5 Benefits of Training in Satellite Communications with AFRALTI.

1. Hassle-Free House-keeping with GVF

AFRALTI takes charge of all house-keeping activities with GVF, making training hassle-free and enjoying experience.

2. PRACTICAL TEST AT AFRALTI

All hands-on practical training will be done at AFRALTI or organized by AFRALTI. This centralization of the experiential aspect of the training should give comfort to an organization wanting to certify its staff.

3. BULK DISCOUNTS

AFRALTI has pre-negotiated with GVF for a special reduced tariff for all participants to qualify for the **ANDREW WERTH SCHOLARSHIP**. This should give budget elasticity to all organizations training with AFRALTI.

4 Points of Contact

Client Point of Contact for enrollment, registration, and service requests:
